Award of Excellence for best Project during GKS

C. Iván Ibarra Pacheco

Senior Software Engineer
Guadalajara metropolitan area, Jalisco, Mexico

Summary

As a Senior Software Engineer at Drift and Salesloft, two leading SaaS companies, I apply my expertise in React, TypeScript, and SCSS to create engaging and user-friendly web frontend solutions. I have 7 years of experience in the news/media, fintech/crypto, food service, and recruitment industries, where I have led teams of 4-5 engineers and delivered high-quality products that met the clients' needs and expectations.

My education background includes a Bachelor's degree in Computer Software Engineering from Universidad De La Salle Bajío, an exchange program at the University of Regina, and a diploma in GO Bootcamp from Wizeline Academy. I also have certifications in React, Go, and Python, and I speak English and Spanish fluently. I am passionate about learning new technologies, developing innovative solutions, and collaborating with diverse and talented teams. I have also received an Award of Excellence for the best project during the GKS 2019 ICT Convergence Summer Program.

Experience

C Infinity Solutions
Senior Software Engineer
September 2025 - Present (6 months)
Remote

Microsoft
Software Engineering Master’s Internship

TrackerMe and TrackerBus
Startup Software Developer
January 2017 - December 2017 (1 year)
León, Guanajuato, Mexico

TrackerMe — IoT Vehicle Security Startup

Co-founded TrackerMe, a social-impact startup focused on reducing vehicle theft in Guanajuato, Mexico through IoT-based tracking solutions.

Led the architecture and mobile app development of the prototype using Xamarin.iOS, integrating Sigfox low-power IoT connectivity for real-time vehicle monitoring.

Recognized in 2017 by the Government of Guanajuato as a high social-impact startup for innovation in public safety.

TrackerBus — Public Transportation Innovation Initiative

Co-created TrackerBus, an initiative aimed at improving safety and operational efficiency in Mexico’s public transportation systems through tracking and optimization technologies.

While not directly implemented, the project helped promote technological modernization efforts within local government transportation services.

Selected as a national finalist in the Santander “Premio a la Innovación Empresarial 2017” in Mexico City.
